PROFESSIONAL SUMMARY

IT and **Network Infrastructure** Supervisor with over **15 years of experience** in **technical support**, **ISP operations**, and **team leadership**. Certified in **MikroTik (MTCNA)** and **UniFi** (Full Stack, Routing & Switching, Wireless). Builds **automation** systems using **Botmaker**, **REST API** integrations, and **Google Apps Script**, backed by a full-stack development foundation (**JavaScript**, **React**, **Java**, **SQL**, **Python**) validated through HackerRank certifications, including **Software Engineer**. Open to full-time roles in network/IT infrastructure or software development, as well as freelance automation and custom app development projects.

WORK EXPERIENCE

Administrative and Technical Supervisor

Lemmon Internet SRL · Rosario, Argentina

Nov 2019 – Present

- Supervise and train administrative staff and field technicians
- Deliver **Tier 2/3 technical support** for connectivity, CPE, Wi-Fi, and provisioning issues
- Manage billing and customer identity/service validation in **ISPCube**
- Oversee **MikroTik** network performance; implement best practices in **PPPoE, QoS, DHCP, and NAT**
- Deliver process improvements that raise operational efficiency and customer satisfaction

Conversational Automation & Bot Integration (*Freelance, concurrent role*)

Botmaker Platform · Remote

2023 – Present

- Integrate **Botmaker** with ISPCube and OLT CLOUD via **REST APIs** for authentication and service checks
- Orchestrate **webhooks**, normalize JSON payloads, and apply error handling and timeout logic
- Design **omnichannel chatflows** (WhatsApp/Web) with user validation and human agent handoff
- Implement **KPI tracking** (funnels, tags, TMO/TTFR/TTR) and run **A/B tests** on chatflows
- Maintain documentation and version control for flows and intents
